
Press release

Prof. Valmed® joins the medatixx HealthHub Clinical Intelligence to support evidence-based clinical decision-making

Langen, Germany – 14th October 2026

Prof. Valmed®, developed by Prof. Valmed – validated medical information GmbH, is one of the first specialized partner solutions available through the new **medatixx HealthHub Clinical Intelligence**. The new interface connects selected practice management software systems from medatixx with AI-powered clinical decision support systems and medical research tools.

As a launch partner alongside praedigo, Prof. Valmed® will be available to users of the medatixx and psyx practice management systems, bringing specialized medical knowledge and clinical decision support closer to everyday practice.

Making medical knowledge more accessible

Healthcare professionals face the ongoing challenge of keeping up with an ever-growing body of medical knowledge while making informed clinical decisions in their daily work. Prof. Valmed® is designed to support medical professionals in accessing relevant medical information and integrating evidence-based knowledge into their clinical workflows.

Through its integration into the medatixx HealthHub Clinical Intelligence, Prof. Valmed® becomes part of an expanding ecosystem connecting practice management software with specialized digital healthcare solutions.

A step towards connected clinical intelligence

The launch of the medatixx HealthHub Clinical Intelligence represents an important step towards connecting clinical software environments with specialized tools that support healthcare professionals in their daily work. The integration of additional medatixx software solutions is planned to follow in Stägers.

For Prof. Valmed®, the partnership provides an opportunity to make its medical knowledge solution accessible to more healthcare professionals through an established practice software ecosystem.
